

Elevate your space

Our Flush Panel Doors give a seamless finish to any room. The doors run on an incredibly smooth roller-bearing, top-hung track system, which means no need for a bottom track to be installed.

Available in sliding or bi-fold options, the door panels are constructed with finger-jointed timber framing and carbon core to prevent warping and twisting, giving you unbeatable quality.

Creating organised homes you love to live in, for more than 35 years.

Flush Panel Features

- Top-hung 40mm flush panels
- Made to measure and supplied unpainted, please check with your sales consultant to discuss finish options for your home
